

Replacement Parts

General Information For Lighting

Submerge fixtures before lighting.

All fixtures must be installed by a qualified electrician. Installation must meet NEC (National Electric Code) for safety.

Section 680-51 (a). A ground-fault circuit-interrupter must be installed in the branch circuit supplying fountain equipment.

Section 680-51 (d). This fixture must be protected by a low water level safety cut-off or other approved.

Lighting must be connected to a Class "A" GFCI (Ground Fault Circuit Interrupter).

Lens Rod Kit	
Part #	Use with Light Fixture
